

Latest brazilian solar container subsidy policy

Who is responsible for energy auctions in Brazil?

Secondly, the Brazilian government is also responsible, through ANEEL and the Chamber of Electric Energy Commercialisation ("CCEE"), for conducting the auctions in which the companies buy the energy that they later distribute.

Who regulates CO2 storage in Brazil?

This bill is part of the "Fuel of the Future" programme and regulates the activity of capturing and geologically storing carbon dioxide (CO2) in Brazil. The National Agency of Petroleum, Natural Gas and Biofuels (ANP) will be responsible for authorising and regulating this activity.

What does the Brazilian government do?

Thirdly, the Brazilian government is also responsible for providing grants to private companies for the development of large-scale renewable energy projects (e.g., wind, solar and biomass), as well as to financing energy projects by means of public banks (e.g., BNDES and BNB).

What is the Brazilian electricity sector?

The Brazilian electricity sector is organised into the generation, transmission, distribution and commercialisation of energy.

Is green hydrogen legal in Brazil?

As mentioned in question 3.7, concerning green hydrogen, there are some Bills of Law ("PLs") under consideration by the Brazilian National Congress to provide a legal and regulation framework to the matter. Among these legislative projects, we can mention:

Who regulates the electricity sector in Brazil?

ANEEL is the main actor in the regulation of the electricity sector in Brazil. Its primary purpose is to supervise and regulate the production, transmission, commercialisation, and distribution of electricity in the national territory. ANEEL is responsible for granting, authorising, or permitting electricity facilities and services.
