

The Microsol SWP Advanced is a differential thermostat for solar heating that controls the water circulation pump based on the temperature differential between the solar collector and the pool or thermal reservoir. The controller has functions to prevent ...

O Microsol SWP Advanced é um termostato diferencial para aquecimento solar que comanda a bomba de circulação de água através do diferencial de temperatura entre o coletor solar e a piscina ou reservatório térmico. O controlador possui funções que evitam o superaquecimento e o congelamento da água no coletor solar.

The Microsol SWP Advanced controller is a differential thermostat for solar heating that controls the water circulation pump through the temperature differential between the solar collector and the pool or thermal reservoir.

The Microsol SWP Advanced is a differential thermostat for solar heating that controls the water circulation pump based on the temperature differential between the solar collector and the pool or thermal reservoir.

The Microsol SWP Advanced is a differential thermostat for solar heating that controls the water circulation pump based on the temperature differential between the solar collector and the pool or thermal reservoir. The controller has functions to prevent overheating and freezing of water in the solar collector. Also provides access protection to

Microsol SWP Advanced. Descripción. Línea. Aplicaciones. Descargar Manual del Producto. Manual / Versiones. 2 1. Producimos una amplia gama de instrumentos digitales para sistemas de automatización industrial, comercial y residencial, siempre a la vanguardia de las necesidades y deseos del mercado. Durante más de 30 años, hemos ofrecido ...
