

Lithuania kallista energy

Who is Kallista energy?

Kallista Energy is an independent renewable energy company. Our activities include wind, solar, electric mobility and battery energy storage. Our approach is focused on the long term, with the objective of generating electricity in the most cost-effective and environmentally sustainable manner. We operate in France, Germany and the Netherlands.

Where does Kallista operate?

We operate in France, Germany and the Netherlands. Kallista Energy group owns and operates 38 wind and solar farms. Additionally, several very high-power recharging stations are currently under development. We are actively engaged in battery electricity storage projects. Contribute to the energy transition !

Will Kallista energy sell wind-generated electricity to lhyfe?

Kallista Energy will sell wind-generated electricity to Lhyfe, one of the world's pioneers in the production of green and renewable hydrogen.

How many wind farms does Kallista energy operate?

Kallista Energy currently operates 38 wind and solar farms in France, the Netherlands and Germany, with total capacity of 438 MW. In the Netherlands, Kallista Energy also has a 40% equity stake in the 102 MW Krammer wind park.

What is Kallista energy doing in France?

In addition to the operation of its renewable energy parks and the realisation of new projects, Kallista Energy has started developing a network of 90 very high-power charging stations for electric vehicles in France, most of which will be directly connected to wind turbines.

What makes Kallista Energy Group different?

Kallista Energy Group owns and operates all its energy infrastructure. Our projects are designed with the support of independent experts and in consultation with local stakeholders. What makes us different ? According to the IPCC, renewable energy sources are among the most effective solutions for mitigating the impacts of climate change.

Since 2005, Kallista Energy has been contributing to the energy transition by remaining true to its values: conviction, ethics, pragmatism and sustainability. Our group is continuing to grow its ...

The Kallista Energy Group has teams dedicated to the development of wind and solar farms as well as recharging stations and battery storage plants. Our teams are involved from project design through to decommissioning or renewal. We work closely with local stakeholders to develop the project that is best suited to the local area. To learn more
