RTE and the Chantiers de l'Atlantique - Hitachi Energy consortium sign a EUR4.5 billion contract for the construction of three offshore direct current platforms and three onshore converter stations for ...

Following an international call for bids, RTE, the project owner of the connection of offshore wind farms, has selected the Chantiers de l'Atlantique and Hitachi Energy consortium to carry out the execution of offshore and onshore conversion stations for the future offshore wind farms in Normandy and Orléans.

Hitachi Energy is an experienced and reliable partner for electricity management and optimisation throughout the entire lifecycle of a hydrogen generation project, from project planning to project implementation and plant lifecycle management.

In Normandy and Orléans, the high voltage direct current (HVDC) transmission systems by Chantiers de l'Atlantique and Hitachi Energy will enable the integration of more than 3.5 GW of renewable energy into the RTE network.
