How many fuel cell engines will Ballard Power Systems Supply?

VANCOUVER, BC, Dec. 20, 2024 /PRNewswire/- Ballard Power Systems (NASDAQ: BLDP) (TSX: BLDP) today announced orders from two bus manufacturers to supply over 90 fuel cell engines, representing approximately 6.4 megawatts (MW) of total rated power, for the European and UK city bus market.

Why has Ballard Power Systems restructured its global operations?

Ballard Power Systems says it has started restructuring its global operations to cut costs due to slower hydrogen infrastructure development and delayed fuel cell adoption. Ballard Power Systems has announced a global restructuring to cut corporate spending due to "a slowdown in hydrogen infrastructure development and delayed fuel cell adoption."

Who is Ballard Power Systems?

Ballard Power Systems Inc. (CNW Group/Ballard Power Systems Inc.) "We are excited with the continued growth of our bus OEM partnerships and our continued progress on customer platform wins and repeat business," said David Mucciacciaro, Chief Commercial Officer at Ballard.

Why should you choose Ballard's fuel cell power products?

Benefitting from our vertical integration - ranging from Membrane Electrode Assembly (MEA), bipolar plates and stack design to complete system integration - Ballard's fuel cell power products deliver proven durability, reliability, and high power density with the lowest total cost of ownership. Explore our fuel cell products.

How many MW of fuel cell products does Ballard manufacture?

Ballard has designed and shipped over 400 MW of fuel cell products to date. Ballard was founded in 1979 by geophysicist Geoffrey Ballard, Keith Prater, and Paul Howard, under the name Ballard Research Inc. to conduct research and development on high-energy lithium batteries.

How many fuel cell engines has Ballard delivered to CPKC?

Up to the end of 2024, Ballard has delivered 10 MW of fuel cell engines to CPKC. In 2020, CPKC announced its initiative to design and build North America's first line-haul hydrogen-powered locomotive.

Ballard Power Systems says it has started restructuring its global operations to cut costs due to slower hydrogen infrastructure development and delayed fuel cell adoption.

Ballard Power Systems has signed a long-term supply agreement with Canadian Pacific Kansas City (CPKC) for the supply of 98 fuel cell engines, each with a 200kW nameplate, totalling 20MW of power. The engines, to be delivered in 2025, will support the expansion of CPKC's hydrogen locomotive programme in North America.

From 45kW to 360kW net power, Ballard's heavy-duty fuel cell modules offer flexible and reliable solutions for your transportation and power generation needs. Powered by Ballard's unique PEM fuel cell stacks, our modules are designed to meet the mechanical, electrical and environmental requirements of the most demanding applications.
