

Military solar container vest

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

What is the best military tactical vest?

This military tactical vest has everything you love about the Condor Elite Tactical Vest with the addition of a removable right-handed cross-draw holster that enables lightning-fast deployment of your sidearm. With duty belt compatibility and plenty of mag storage, this military vest is as functional as it is comfortable.

Which Condor vest should I buy?

One of our favorites is the Condor Elite Tactical Vest, which features air mesh padding on the shoulders to reduce strain on pressure points. With a mesh liner, this Condor vest is ideal for summer duty. If you're looking for a no-fuss, no-muss carrier vest, the Condor Cross Draw Vest is the setup for you.

How do I choose a tactical vest?

Tactical vests have different styles, but their main goal is to give you quick access to your equipment. Many are compatible with duty belts and have sidearm and mag storage, as well as PALS/MOLLE webbing. When shopping for a tactical vest, comfort should be your first priority. After all, the best tactical vest is the one you'll wear.

When should you buy a tactical vest?

Choose a tactical vest any time you need additional storage. Tactical vests have different styles, but their main goal is to give you quick access to your equipment. Many are compatible with duty belts and have sidearm and mag storage, as well as PALS/MOLLE webbing. When shopping for a tactical vest, comfort should be your first priority.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
