

How will China's new guidelines reshape the solar industry?

In November 2024, China's Ministry of Industry and Information Technology released revised guidelines for the photovoltaic (PV) industry. The new guidelines are set to reshape the solar manufacturing industry, addressing overcapacity, pricing volatility and inefficiency across the value chain.

Will 200 GW of new PV module manufacturing capacity materialise?

Approximately 200 GW of new PV module manufacturing capacity planned in the next few years will likely not materialise, as the guidelines target new capacity expansions and speculative investments. These plans, driven by recent entrants, face hurdles due to capital requirements and technology standards.

What are the new photovoltaic industry guidelines?

The revised guidelines encourage photovoltaic companies to focus on technological innovation, product quality improvement, and production cost reduction, rather than merely expanding capacity.

Ministry of Solar is dé specialist in zonnepanelen en renewable energy oplossingen voor bedrijven. We ontwikkelen uw energie-oplossing/zonnepark van A tot Z, ...
