

"M.E.R. aims to make Monaco one of the first States to have 100% green electricity production capacity, equivalent to consumption in its territory," stated Marie-Pierre Gramaglia, Minister of Public Works, the Environment and Urban ...

This website is an interactive map that allows users to easily identify every roof in Monaco, its potential solar resource, the exploitable area on which photovoltaic panels could be installed, and the possible annual electricity production. This means that residents can find out the solar capacity of their building.

The aim is to invest in renewable electricity production assets outside Monaco. The Minister emphasised: "The reason we are seeking to develop or purchase green power stations abroad, primarily in France for the time being, is to increase the share of green electricity we import and to safeguard, over the long term, the cost of supplying ...

8. Current Installations. Specific number is not available for residential solar panel installations, however, In Monaco, various buildings have adopted solar power generation, including residential complexes like Hélios and Jardins d'Apolline, as well as commercial properties such as the SBM Offshore building in Fontvieille, which harness solar energy to ...

"The facilities, which are located in Côte-d'Or, Haute-Vienne, Landes and Gard, will generate a total of 65,000 MWh per year, or around 12% of the Principality of Monaco's electricity consumption." By the end of 2021, M.E.R. will own 15 ...

A giant solar power station has been inaugurated on the roof of Monaco's Grimaldi Forum, marking a significant milestone in the Principality's energy transition. Eventually, electricity generated from the station will be used to power the new eco-district.

Finding the best solution: our innovative solar installation leading the way to a sustainable future."
