

Montenegro origin solar battery

In a pioneering move for state-owned utilities in the Balkans, Montenegro's largest power utility, EPCG, is planning to launch a large-scale, battery energy storage procurement exercise by the...

By the end of this year, Elektroprivreda Crne Gore (EPCG) is expected to announce a public tender for the procurement of 300 megawatt-hours (MWh) of battery systems, which are crucial for the implementation of the green transition, as announced by the company's Chairman of the Board, Milutin Dukanovic.

Lithium-ion battery systems store energy when demand is low and release it when it's high, making Montenegro's energy grid more flexible and reliable. For example, during a sunny day, energy stored from the Kapino Polje solar plant could ...

Elektroprivreda Crne Gore, controlled by the Government of Montenegro, started the preparations to install battery energy storage systems. It is a pioneering move among state-owned power companies in the Western Balkans as well as in Southeastern Europe,

Global Battery Alliance launches Battery Passport pilots The Global Battery Alliance (GBA) has just launched the second wave of its Battery Passport pilots, which includes 11 pilot consortia. This second wave will establish the Minimum Viable Product of the GBA Battery Passport with a product-level ESG (Environment, Social, Governance) score.

6 · In a pioneering move for state-owned utilities in the Balkans, Montenegro's largest power utility, EPCG, is planning to launch a large-scale, battery energy storage procurement exercise by the end of 2024.

Elektroprivreda Crne Gore (EPCG), the largest state-owned power company in Montenegro, has taken a significant step in energy innovation by preparing to install battery energy storage systems (BESS). This initiative is a first for the Western Balkans and Southeastern Europe, marking a crucial development in the region's energy landscape.

4 · "By the end of year, EPCG will announce a public call for the procurement of battery energy storage systems (BESS) with a capacity of 300 MWh," he said, according to EPCG. EPCG plans to finish two more large-scale projects by the end of 2026

Global Battery Alliance launches Battery Passport pilots The Global Battery Alliance (GBA) has just launched the second wave of its Battery Passport pilots, which includes 11 pilot consortia. This second wave will establish the Minimum Viable Product of the GBA ...

EPCG, the Electric Power Company of Montenegro, will launch a public tender for the procurement of

Montenegro origin solar battery

300MWh of battery energy storage system (BESS) technology before the end of the year, said Milutin Dukanovic, chairman of the board of directors.

This initiative includes supporting the flexibility of the energy system through the development of lithium-ion battery storage systems. Supported by BESS technology will enable the storage of surplus energy generated from renewable sources, reducing reliance on fossil fuels and supporting sustainable development.
