

# Namibia glass glass pv modules

What is a glass-glass module?

Glass-Glass module designs are an old technology that utilises a glass layer on the back of modules in place of traditional polymer backsheets. They were heavy and expensive allowing for the lighter polymer backsheets to gain the majority of the market share at the time.

Are glass-glass modules bifacial?

Despite the challenges of the glass-glass modules design, the increased reliability, subsequent 30 year warranty and transparent back enabled bifacial technology to exist.

How long will a glass-glass module last?

Therefore, over a 30 year lifetime it can be expected to still operate at 85% of the nameplate capacity. The weight of glass-glass modules are still an issue, with current designs using 2 mm thick glass on each side for framed modules, the weight is about 22 kg, while 2.5 mm on each side will increase the module's weight to 23 kg.

How much does a glass module weigh?

The weight of glass-glass modules are still an issue, with current designs using 2 mm thick glass on each side for framed modules, the weight is about 22 kg, while 2.5 mm on each side will increase the module's weight to 23 kg. Compared to traditional glass-foil modules, which are about 18 kg, this is a 20% increase in weight.

What is the difference between tempered glass and glass-foil modules?

Compared to traditional glass-foil modules, which are about 18 kg, this is a 20% increase in weight. Although there is no standard on glass thickness, in general it is a more complex and expensive process to produce very thin, tempered glass. However, 2.5 mm glass thickness does allow for frameless designs, which can reduce costs dramatically.

The German company Suntrace has recently been selected as a consultant for the 80 MW Tses solar off-grid project. The future facility will supply electricity to several plants owned by Groot Glass, a company based in ...

Double-glass modules boast increased reliability, especially for utility scale PV projects. These include better resistance to higher temperatures, humidity and UV conditions and have better mechanical stability, reducing the risk of microcracks during installation and operation.

The TeraSlate™; glass-glass photovoltaic module from 3S Swiss Solar Solutions is a sophisticated, high-quality photovoltaic module for BIPV facade solutions. The powerful, frameless and aesthetically designed solar modules can be used with various substructures, offering maximum flexibility for a wide range of facade applications. ...

Namibia Solar Photovoltaic Glass Market (2024-2030) | Companies, Forecast, Segmentation, Trends, Size, Share, Outlook, Analysis, Growth, Value, Industry & Revenue

Namibia's Groot Glass has appointed Germany-based Suntrace as Technical Consultant for the development of an 80MW Solar Photovoltaic (PV) Plant. The power plant will generate electricity and power the planned Groot Glass Manufacturing Factories in ...

Double-glass modules boast increased reliability, especially for utility scale PV projects. These include better resistance to higher temperatures, humidity and ...

Groot Solar PV Park is an 80MW solar PV power project. It is planned in Karas, Namibia. The project is currently in permitting stage. It will be developed in single phase. The project construction is likely to commence in 2023 and is expected to enter into commercial operation in 2024.

The German company Suntrace has recently been selected as a consultant for the 80 MW Tses solar off-grid project. The future facility will supply electricity to several plants owned by Groot Glass, a company based in Windhoek, Namibia's capital.

Namibian glass producer Groot Glass Limited has contracted a German technical consultant for the development of an 80-MW DC solar photovoltaic (PV) power plant in Tses, Namibia's Karas Region.

Glass manufacturer Groot Glass intends to seek an engineering, procurement and construction (EPC) contractor to build, finance, own and operate an 80MW solar photovoltaic (PV) plant in Tses in the Karas region of southern Namibia.

Namibia Building Integrated Photovoltaics (BIPV) Glass Market is expected to grow during 2023-2029  
Namibia Building Integrated Photovoltaics (BIPV) Glass Market (2024-2030) | Value, Share, Trends, Forecast, Segmentation, Size & Revenue, Competitive Landscape, Growth, Companies, Analysis, Outlook, Industry

Groot Glass Limited, the premier glass manufacturing company in Namibia, has appointed Germany-based Suntrace GmbH as the Technical Consultant for the development of 80MW Solar Photovoltaic...
