Are Britain & Norway planning a green energy partnership?

Photographer: Leon Neal/Getty Images Britain and Norway are set to announce plans for an industrial partnership for green energy including a future arrangement to transport of carbon under the sea. The broad agreement, to be signed in 2025, "will support our aim to secure home-grown energy," according to a statement from the UK government.

What products does green scene offer?

The products offered by Green Scene are namely; Solar Home Systems and lighting products, Productive Use / Irrigation solutions and EPC services for mini grids installations.

Why is Norway using natural gas?

The technology allows natural gas to be used for longer, benefitting Norway as a major exporter of the fuel. The two nations are seeking to bolster their energy and defense ties after the energy crisis that followed the Kremlin's invasion of Ukraine transformed the energy picture for Europe.

Why did Norway replace Russia as the largest natural gas supplier?

It sent power prices and gas prices soaring-- at least temporarily -- and led Norway to replace Russia as the largest natural gas to both the European Union and the UK.
