OUPES Titan 5 delivers pure sine wave current and features individual circuit breaker protectors for each socket, ensuring that an overload in one does not affect the others.

The charging time depends on the battery capacity and the charging speed of your power station. We use the following formula to estimate the charging time: Estimated Charging Time = (Battery Capacity / Charging Speed) \* 0.85 Please note that this is only an estimate. For example, to charge a Mega 5 with AC power (maximum charging speed of 1800W and capacity of ...
