What is a mobile solar container?

The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere.

What is a solarcontainer?

The Solarcontainer is a mobile system that can be used for both on- and off-grid purposes, including rescue missions and gatherings. The foldable photovoltaic panels are tucked inside a mobile solar container. The mobile solar container can take up to five hours to assemble and make it operational.

How a mobile solar container can be transported?

This setup enables easy transport of the mobile solar container via cargo ship vessels, trains, and trucks, given that the rail system can be stashed until it fits the container's frame. The unfolded panels can reach up to 120 meters in length, and around 240 solar panels can be installed.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?

How long does it take to set up a solarcontainer?

SolarCont states that at least three or four people, excluding the crane operator, may be needed to set up the Solarcontainer into operation within one day. The Solarcontainer can also be lifted or shifted without a foundation, but if the user faces harsh wind conditions, ballast stones can be placed on the rail system if needed.
