

# Poland batteries to store solar energy

Poland is set to lead Eastern Europe's battery storage market, with 9GW offered grid connections and 16GW in the capacity auctions.

3 &#0183; The much-anticipated capacity market auction for 2029 conducted by Polskie Sieci Elektroenergetyczne (PSE) ended in the seventh round with a price of PLN 264.90 (\$62.12)/kW per year.

This is also the first energy storage project in the Polish market, operated in partnership with ML System S.A., a pioneering firm in Poland's solar energy sector. The newly launched energy storage project will be combined with a 1MW solar power plant also produced and sold by BYD, enabling peak shaving and create a more balanced power network.

In Poland, the industrial and large-scale battery energy storage sector is only in its infancy. However, commercial backyard energy storage, complemented by prosumer photovoltaic installations, is growing rapidly, particularly due to falling prices over the past few years and increases in efficiency.

5 &#0183; European Energy sees battery storage as a cornerstone of its future strategy, aligning with its commitment to integrating innovative technologies into renewable energy solutions. Beyond Poland, European Energy is actively exploring battery projects in other European countries, where energy storage is becoming increasingly critical to balancing intermittent ...

3 &#0183; EDP Renewables has been awarded with contracts for its two first battery energy standalone storage projects in Poland. The contracts, that will last for a period of 17 years, were granted by the Polish Grid Operator (PSE) in the recent capacity market auction and will amount to a total installed capacity of 160MW.

This transition time brings a large number of new opportunities for battery storage in Poland. Access the report to discover: What revenue and risk does capacity market participation bring? How much value is there in wholesale market arbitrage? How will Poland's flexibility markets function?

To reach a target, the current solar potential in Poland, the photovoltaic (PV) productivity, the capacity of the energy storage in batteries as well as the size of the hydrogen production...

5 &#0183; DWF, the global provider of integrated legal and business services, has advised EDF Renewables on the acquisition of a 120 MW battery energy storage project in Poland. DWF's comprehensive advice covered all stages of the transaction, including due diligence, preparation and negotiation of transactional documentation and support in the closing phase of the ...

5 &#0183; European Energy sees battery storage as a cornerstone of its future strategy, aligning with its commitment to integrating innovative technologies into renewable energy solutions. Beyond Poland, European Energy is actively ...

Following the expansion of these services to the Swedish market, Axpo is launching a dedicated battery business in Poland. The company plans to support stabilisation of the Polish power grid through storage facilities while also participating in the country"s capacity mechanism and trading on short-term markets.
