

Powersafe battery Pitcairn Islands

Where are powersafe batteries marketed?

PowerSafe products are marketed under the SuperSafe brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.

What is a powersafe 12v45 battery?

With proven compliance to the most rigorous international standards, PowerSafe 12V45 batteries are recognized worldwide as a premium solution for Telecom applications. The EnerSys range of PowerSafe 12V45 batteries has been designed specifically for use in applications that demand the highest levels of security and reliability.

What are powersafe SBS batteries?

Manufactured to the highest international standards, PowerSafe SBS batteries offer outstanding performance in both float and cyclic applications. The high energy density of these batteries makes them ideal for system upgrades or reduced installation footprint, while still delivering dependable backup protection.

Are EnerSys 12v45 batteries safe?

The EnerSys range of PowerSafe 12V45 batteries has been designed specifically for use in applications that demand the highest levels of security and reliability. With proven compliance to the most rigorous international standards, PowerSafe 12V45 batteries are recognized worldwide as a premium solution for Telecom applications.

Are powersafe V batteries good for UPS?

The reputation of PowerSafe V batteries for long service life, together with excellent high-rate performance, also makes them the number one choice for high integrity, high specification UPS systems. The 6V155 top terminal cells and monoblocs deliver superior performance whilst occupying less space than conventional standby power batteries.

What is a powersafe V battery?

The use of V-0 rated flame retardant ABS plastic for the thick wall containers and lids offers high mechanical strength with excellent safety features. PowerSafe V batteries are designed using gas recombination technology which removes the need for regular water addition by controlling the evolution of hydrogen and oxygen during charging.

The PowerSafe OPzV range of valve regulated lead-acid batteries uses a proven combination of gel and tubular technologies to offer a very high level of reliability.
