Does Invenergy work in Mexico?

Since the opening of the Mexico City office, Invenergy's presence in Mexico has grown exponentially, and our in-country team of experts can address the energy goals of industrial, commercial, and utility customers not only in Mexico, but around the world.

What is Mexico's energy goal?

According to Mexico's Energy Transition Law (Ley de Transición Energética) and General Climate Change Law (Ley General de Cambio Climático), Mexico's goal is 35 percent of electricity from clean energy sources by 2024, which includes power regeneration from renewable and non-renewable sources such as nuclear and efficient cogeneration.

Why should Mexican companies invest in green hydrogen?

A versatile energy carrier that is increasingly seen as a requirement for decarbonizing hard-to-abate sectors. Supply disruptions already affecting Mexican businesses. Mexico has some of the best potential green hydrogen resources in Latin America. Develop a national hydrogen road map to provide direction for industry and investors.

Mexico has enormous potential to develop renewable energy projects. The country has high solar radiation, wind capacity, and geothermal sources. In addition, with the right technologies and expertise, the country could increase ...

In support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides insights on the ways in which the outlook for the region and the biggest global energy trends are deeply intertwined - as well as recommendations on policies that could allow Latin America and the Caribbean to take full ...

The clean energy transition in Mexico and abroad has made great progress, and there is still a lot of work to do. From nearshoring supply chains to increasing the buildout of clean energy, it will take continued public-private collaboration to meet the scale of increasing clean energy demand, and Invenergy is proud to be on the forefront of ...

In support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides insights on the ways in which the outlook for the region and the biggest global energy trends are ...

Background: On February 5, 2024, President López Obrador (AMLO) proposed significant changes to Mexico's energy sector through constitutional reform. This initiative is part of a broader agenda to enhance state control over strategic industries, particularly energy, which he considers crucial for national sovereignty. The reform aims to place the energy sector ...

Regenco energy Mexico

Mexico's betting on the state of Sonora to lure energy investment while helping the government meet its 2030 emissions reduction targets.

In Mexico, the areas with the greatest potential for the use of wind energy are the states of Oaxaca, Baja California and those belonging to the Gulf. Photovoltaic energy. On the other hand, photovoltaic energy is a clean energy that uses the sun's rays or solar radiation to transform it into electrical or thermal energy.

Rengen Energy Solutions ha participado en diversos proyectos de Hidrocarburos en sus diferentes estados, incluyendo gases y líquidos. Nuestros proyectos abarcan desde sistemas de compresión y bombeo, hasta procesos químicos como la refinación.

MEXICO: NORTH AMERICAN CLEAN ENERGY POWERHOUSE | 4 Mexico Has Abundant Renewable Energy Resources to Meet Its Energy Goals
o Mexico generated 86.27 TWh or 26.7% of its electricity from clean energy resources in 2021. o To meet the 35% clean energy target in 2024, Mexico needs at least 128.83 TWh or 42.56 TWh of additional
