

The European Bank for Reconstruction and Development (EBRD) is providing a loan of up to EUR31.6 million to Hrvatska Elektroprivreda d.d. (HEP), Croatia's national energy company to finance the construction and ...

In recent days two major Croatian energy companies -- oil and gas group INA and state oil pipeline operator Janaf -- have announced new commitments ...

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krsko nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix. [1]

Croatia has excellent potential for the development of renewable energy resources. Currently, the country covers 28,02% of the gross final energy consumption by renewable energy. Hydropower is the dominant renewable source at this moment; significant funds have been invested in the production of electrical energy from wind power, and solar ...

The EU funding and the Croatian government initiatives will likely result in an increased demand for innovative, reliable, and cost-effective renewable energy solutions in Croatia. We can expect more solar and geothermal power plants, and more production facilities installed by consumers for their own consumption and trade.

Croatia wants to cut its CO₂ emissions by 45% by 2030 and to abandon coal by 2033. But the transition to a low-carbon economy won't be easy, requiring major investments in new energy infrastructure and increased renewable energy resources. To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan.

The European Bank for Reconstruction and Development (EBRD) is providing a loan of up to EUR31.6 million to Hrvatska Elektroprivreda d.d. (HEP), Croatia's national energy company to finance the construction and operation of a ...

Statkraft assesses the business climate for renewable energy sources in Europe as challenging due to the cannibalisation of photovoltaic projects and frequent negative prices rendering projects unsafe. Regarding Croatia, they admit that the procedures for obtaining permits should be accelerated and the processes by county should be standardised.

Statkraft is a leading company in hydropower internationally and Europe's largest generator of renewable energy. The Group produces hydropower, wind power, solar power, gas-fired power and supplies district heating.

Renewable energy company in Croatia

Croatia wants to cut its CO₂ emissions by 45% by 2030 and to abandon coal by 2033. But the transition to a low-carbon economy won't be easy, requiring major investments in new energy infrastructure and increased ...

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050. The Strategy includes a wide range of energy policy initiatives that will improve energy security ...

opportunities for investors to develop renewable energy projects in Croatia or to introduce technological solutions that are currently lacking in the market. Croatia's renewable energy industry Renewable sources supply around 30% of Croatia's energy needs, but only two percent is solar energy. The potential for solar energy is estimated at ...
