

Kampala, Uganda | THE INDEPENDENT | Experts in the renewable energy sub-sector have called for free progress towards a clean energy society instead of forcing the transition. They advise that the energy sector specifically renewable energy is organic and that Uganda, as a renewable energy market will keep growing as demand and ability of the ...

Our upcoming solar factory in Matugga, Uganda, is a significant milestone for us at Nexus Green. We are making a substantial investment of US\$7 million to establish this state-of-the-art solar products plant, which will have a profound impact on the renewable energy landscape in East Africa.

UAE-based renewable power developer AMEA Power has started construction at the 24MW Ituka solar PV project in Uganda, which will be the largest in the region upon its completion.

Uganda is endowed with abundant renewable energy potential from sources such as biomass, water, wind and the sun. The country generates more than 90% of its power from renewable sources, mainly hydro which contributes about 80% of the total energy mix.

In Uganda, we have a network of approximately 200 service stations, where we retail our fuel and products, and offer related services. In our service stations, we also sell distributed solar solutions to low-income communities.
