

Rheinmetall power systems Martinique

What business units does Rheinmetall have?

The Power Systems division also represents Rheinmetall's global aftermarket activities through the Trade business unit. The Air Management business unit focuses on systems and components for air and exhaust gas management in combustion engines.

Who is Rheinmetall?

Rheinmetall is a leading international systems supplier to the defence industry and a driver of forward-looking innovations in the civilian markets.

Does Rheinmetall invest in future Guns?

Rheinmetall invests in capacities... PANTHER - 100% Rheinmetall! Unrivalled lethality with the 130mm Future Gun system (FGS) and optimised sensor-to-shooter-links. The Panther is designed with a digital architecture enabling openness with the NGVA standard. This is the key enabler for future decision support and automation systems.

Is Rheinmetall AG affiliated with American Depository Receipts (ADR)?

Rheinmetall AG and its affiliates are neither associated with nor provide any support to American Depository Receipts programs (ADR) or comparable offerings or investment schemes related to shares in Rheinmetall AG in the United States of America or any other jurisdiction.

How will the economic downturn affect Rheinmetall's business development?

Further, the economic downturn in Rheinmetall's markets, and changes in interest and currency exchange rates, may also have an impact on Rheinmetall's business development and the availability of financing on favorable conditions.

In der Division Power Systems bündelt der Rheinmetall-Konzern seine Innovationskraft und Kompetenz im zivilen Geschäft. Hier entstehen zukunftsweisende Lösungen, Steuerungstechnologien und digitale Applikationen, unter anderem für die Automobil- und Energiewirtschaft.

Rheinmetall's SiC MOSFET half-bridge power module is the cornerstone of advanced e-traction inverter technology, designed for the forefront of electric vehicle propulsion. This power module is uniquely scalable for vehicle specific volt-age and power requirements, with configurations available for both 750V and 1,200V systems.

Relevant engineering discipline and/or have equivalent experience, preferably in Mechanical Engineering with knowledge of mechanical mass-spring-damper dynamic systems. You must be experienced in Vibration analysis, and be familiar with the meaning, interpretation and manipulation of Power Spectral Density curves
