

4 · By the end of 2023, North Macedonia had deployed 535 MW of solar capacity, a significant increase from 190 MW at the end of 2022, according to the International Renewable Energy Agency (IRENA).

The European Bank for Reconstruction and Development (EBRD) has announced that North Macedonia's state-owned power utility, ESM, has initiated a tender process for the construction of two new solar power plants, with a total combined capacity of 30 MW.

With its abundant sunlight and favorable climate, the country is well-positioned to harness solar energy through photovoltaics (PV). This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to ...

Renalfa IPP is building a solar power plant in the REK Oslomej coal complex in North Macedonia under a public-private partnership. It obtained financing from the Green for Growth Fund. The days of coal-fired power plants in the Balkans are numbered, according to all the outages, abrupt closures, market volatility and environmental requirements.

3 · Minister of Energy, Mining and Minerals Sanja Bozinovska said the facilities would produce a combined 46 GWh per year, enough to cover the electricity needs of more than 7,000 households in North Macedonia. "The energy transition represents a vision for the future in which we will have clean energy, a healthy environment, and economic ...

3 · Minister of Energy, Mining and Minerals Sanja Bozinovska said the facilities would produce a combined 46 GWh per year, enough to cover the electricity needs of more than 7,000 households in North Macedonia. "The ...

North Macedonia has considerably expanded its renewable energy capacities through a self-consumption scheme and has progressed on energy efficiency with a focus on finalising the

The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by the public company JSC Elektrani na Severna Makedonija (ESM). This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation.

"The huge sustainable energy potential of North Macedonia, especially through wind and solar energy, is an enormous opportunity for the country, which is important in the advancement of the Green Agenda", emphasized Holger Schröder from the European Commission's Directorate for Neighbourhood Policy (DG NEAR).
