Sagemcom Energy & Telecom concentrates Sagemcom's expertise in telecom and metering, enabling the supply of customized connected systems to utilities, telecom operators and services operators worldwide. Thanks to the talents of its R& D and its industrial capacities, Sagemcom Energy & Telecom operates in smart meter, smart grid, smart sites ...

Sagemcom proposes optimised power stations for isolated off-grid sites and on-grid sites to ensure high quality of services for Telecom sites. Thanks to renewable energy sources, this solution reduces the use of diesel generators, the corresponding operating costs (consumption of fuel) and the carbon footprint.

The program also includes regular energy audits to monitor and evaluate the company's energy consumption and identify opportunities for improvement. SAGEMCOM has also embraced the use of renewable energy to power its operations. The company has invested in renewable energy sources such as wind and solar power to reduce its reliance on fossil fuels.

Sagemcom is a global company, with in house R& D and high tech manufacturing, providing the whole scope (turnkey construction, energy equipment, fiber connection, cell site monitoring, managed services et cetera) and therefore able to bear the whole responsibility from manufacture to maintenance.
