Barefoot Power is a leader in the design, manufacturing and distribution of solar powered assets that enable sustainable lifestyles and generates income to off-grid/ weak-grid households and communities in Africa and South Pacific.

To increase low-carbon electricity generation, St. Pierre & Miquelon can draw lessons from several countries that have successfully integrated clean energy into their electricity portfolio. For instance, France generates roughly 67% of its electricity from nuclear energy, showcasing the potential of nuclear as a stable and substantial source of ...

Saint Pierre and Miquelon: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Barefoot Power is selected by the EU and is charged with implementing WISE (Women Increasing Sustainable Energy access and use), a comprehensive action targeting at increasing the involvement of women in solar and clean cooking technologies, boosting their active role, their entrepreneurship and improving their access to energy services.
