

# Samoa smart energy technologies

What is the Samoa Energy Review 2017-2019?

The source is acknowledged. This is the eleventh review that covers the period from 2017 to 2019. The Samoa Energy Review 2017-2019 is produced by the EPCMD1, under the Ministry of Finance to provide the Government of Samoa, business community and the general public with a better understanding of energy data trends,

What are the main energy sources in Samoa?

Coal, LPG and electricity. Hydro Power - Contribution from hydro power to the overall energy production in Samoa over the years have been decreasing considerably from a general annual generation of 3.9- 4.9ktoe in the early 2000 to average of 2.8Ktoe in the last three years. This has reflected a drop of

What technologies are used in Samoa?

Coal, solar, wind, and biogas. Biomass use in Samoa is mainly utilized for domestic cooking. Solar Photovoltaic and Solar Water Heater Systems are commonly used solar technology in Samoa. Hydro-power has been used comprehensively for generation of power

What is Samoa energy sector plan 2017-2022?

Energy security and freedom for all". Samoa Energy Sector Plan 2017-2022: "Sustainable and affordable energy supply for all". From 2017 to 2019, total energy produced and imported in Samoa is estimated to be 121.7 kilo tons of oil equivalent (kTOE) in 2017, however it decreased to 119.5 kTOE by the year 2018, till a significant increase

What are commercial services in Samoa?

Commercial services in Samoa. Categorized energy use from the commercial sector includes electricity consumption in buildings; direct sales from oil companies to the commercial sectors and private energy consumption at commercial buildings which are accounted for

What type of heat is used in Samoa?

Coal, ocean and geothermal heat. Those that are currently sustainable and utilized in Samoa include biomass, hydro-power, solar, wind, and biogas. Biomass use in Samoa is mainly utilized for domestic cooking. Solar Photovoltaic and Solar Water Heater Systems are commonly used

Samoa has a target of 70 per cent renewable energy use by the end of 2031, transitioning to a mix of solar, wind and hydropower augmented by battery storage. Context is crucial when considering what technologies are appropriate for any given situation.

The Electric Power Corporation's \$4.1 million Smart Meters Project should be in full operation next year, says General Manager, Faumui Tauiliili Iese Toimoana in a telephone interview with the Samoa Observer, ...

Itron will deploy its OpenWay™; Riva IoT solution, smart meters and the Itron Prepayment Management

# Samoa smart energy technologies

Platform (IPMP) support system for the Electric Power Corporation (EPC) in Samoa. The aim is to improve vending ...

Apia, SAMOA - Australia is pleased to support Samoa's critical work towards 100% renewable energy through the handover of the OpenCEM electricity sector modelling tool. OpenCEM Samoa represents a crucial advancement in energy sector planning for the Government of Samoa, through the Electric Power

Launched in 2023, Samoa's Climate Action Pathways for Island Transport (CAP-IT) project, backed by a US\$15.5 million investment from the Government of Japan, aims to accelerate the nation's transition to a green, low-carbon future. ...

Itron will deploy its OpenWay &#174; Riva IoT solution, smart meters and the Itron Prepayment Management Platform (IPMP) support system for the Electric Power Corporation (EPC) in Samoa. The aim is to improve vending channels for prepaid electricity and increase awareness of the distribution system.

The primary purpose of this report is to document Samoa's energy history and provide perspectives on issues related to past energy supply and demand, the data also serve to monitor and evaluate Samoa energy goals and targets conducive to the successful progress according to the overarching;

Apia, SAMOA - Australia is pleased to support Samoa's critical work towards 100% renewable energy through the handover of the OpenCEM electricity sector modelling tool. OpenCEM Samoa represents a crucial ...

The country's achievements in smart grids, energy efficiency, and green finance --underpinned by a robust policy framework--offer important lessons for other islands facing similar challenges, such as limited land availability and reliance on imported energy. ... Samoa, Timor-Leste, Vanuatu and Singapore to explore renewable energy ...

Launched in 2023, Samoa's Climate Action Pathways for Island Transport (CAP-IT) project, backed by a US\$15.5 million investment from the Government of Japan, aims to accelerate the nation's transition to a green, low-carbon future. Implemented by UNDP, the project focuses on decarbonizing transportation through e-Mobility solutions.

The renewable energy project report states that the vulnerable people of Samoa will receive subsidized electricity tariffs and secure energy for all residents, creating social inclusion to help develop income generation models for the poorest project participants. The projects are established on existing sites with any that required land ...
