

Second-hand large solar container equipment recycling phone number

Can a discarded solar panel be reused?

A discarded solar panel often turns out to be very suitable for reuse, because it still has a capacity of more than 90%, for example. Refurn is the only recycler in the Netherlands to be Cenelec certified for the reuse of solar panels. Every solar panel we collect is checked for its suitability for reuse. That's easily 2,500 panels per year.

Does refurn recycle solar panels?

Refurn is the only recycler in the Netherlands to be Cenelec certified for the reuse of solar panels. Every solar panel we collect is checked for its suitability for reuse. That's easily 2,500 panels per year. We then deliver the suitable solar panels to Refurn. Refurn carries out repairs and cleans and inspects the panels.

Can you recycle electronics if it has a plug?

Of course, the focus has been on computer hardware recycling, but we have picked up the following equipment for electronics recycling, among others. In short, if it has a plug then can make sure it is recycled according to WEEELABEX standards. We wrote a nice blog about electronics recycling.

Can I recycle a device that contains electrons?

We at IT recycling can recycle for you any device that contains electrons. IT-recycling is also the address for recycling return goods. When recycling return goods, it is often important that the return goods are destroyed with a certificate. We really can destroy all types of return goods.

What can we do with used solar panels?

Used solar panels, we can do something with those! In recent years, solar panels have been installed on many homes in the Netherlands, combined with the construction of large solar energy parks. This is a great development towards a fossil-free society! Normally, a solar panel will last more than 20 years.

Do you offer electronics recycling?
