Where is Drax Power Station?

Drax power station is an operating power station of at least 2676-megawatts (MW) in Drax, Selby, North Yorkshire, United Kingdom with multiple units, some of which are not currently operating. It is also known as UK Oxy CCS Demonstration Project (White Rose CCS Project). The map below shows the exact location of the power station. Loading map...

Who uses Drax power?

Drax supplies renewable source power to over 165,000 businesses and organisations across the UK, including electricity from Drax Power Station. We provide and manage electricity for large industrial and commercial sector customers from our offices in Northampton and Ipswich. Opus Energy

Who is Drax Group plc?

Drax Group plc, trading as Drax, is a power generation business. The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business.

What role does Drax Power Station play in UK energy security?

With an increase in intermittent renewable generation forecast in the coming years and around 7 GW of nuclear and coal capacity expected to close between 2024 and 2030, along with growing uncertainty around new nuclear development timelines, Drax Power Station will have a significant ongoing role to play in UK energy security.

Where is Drax based?

The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business. The company is listed on the London Stock Exchange and is a constituent of the FTSE 250 Index.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

Drax is the second-largest sustainable biomass producer globally, and the UK's largest source of renewable power by output. Explore our locations and our sustainable biomass approach ...

Renewable energy in Seychelles is a recent development in providing power to the country. Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW ...

Drax Power Station is the UK's single largest source of renewable power, providing 2.6GW of dispatchable secure generation. In 2023, it provided 4% of the UK's electricity and 8% of its renewable power. The Selby site provides enough secure power for 4 million homes, and is not dependent on the wind blowing or the sun shining to generate.

The new power station would be built within a new, hollowed-out cavern which would be large enough to fit Big Ben on its side, to the east of Drax's existing 440MW pumped storage hydro station. More than two million tonnes of rock and soil would be excavated to create the cavern and other parts of the power station.

National Grid has upgraded its Drax 132kV substation to accommodate the connection of TagEnergy's 100MW/200MWh battery energy storage system (BESS). According to the renewable energy developer, the facility in North Yorkshire is the largest transmission-connected battery storage system in the UK.

## Seychelles drax power

(Bloomberg) -- Drax Group Plc pushed back the start of three new gas-fired power stations to next year because of delays in getting the units connected to the grid. As demonstrated during last week's power squeeze in Europe, gas-fired plants that can start up quickly are still very much needed even though the region is pursuing aggressive ...
