

What is a freemaq multi PCSK?

Based on our Freemaq PCSK, The Freemaq Multi PCSK is a 1500V modular battery energy storage inverter with 27 models ranging in size from 1525kW to 4390kW. The Multi PCSK supports up to four separate BESS.

What are freemaq PCSK stations?

Combined with our MV SKIDS, the Freemaq PCSK stations are turn-key solutions ready for connection to the battery container and MV power distribution wiring. The advantages of a central inverter with the modularity of the string inverters. It allows the DC power redistribution when one module fails.

Who is power electronics freemaq PCSK?

Power Electronics is a proven partner in the solar and energy storage market. The Power Electronics Freemaq PCSK offers proven hardware to meet storage and grid support challenges. The energy production industry is embracing renewable energy sources.

Does freemaq PCSK work with all battery technologies?

Configurable DC and AC voltages make it compatible with all battery technologies and manufacturers. The Freemaq PCSK can perform grid support functions such as: Peak Shaving, Ramp Rate Control, Frequency Regulation, Load Levelling and Voltage Regulation, controlled by a Battery Plant Controller or SCADA.

What is freemaq PCSK firmware?

Freemaq PCSK firmware includes the latest utility interactive features (LVRT, OVRT, FRS, FRT, Anti-islanding, active and reactive power curtailment...), and is compatible with all the specific requirements of the utilities. Inverters can withstand any voltage dip or profile required by the local utility.

Why should you choose freemaq PCSK?

The total access allows a fast swap of the FRUs without the need of qualified technical personnel. With the Freemaq PCSK, Power Electronics offers its most compact solution, achieving 3.8MW in just 12ft long, reducing installation costs and labor time.

The Freemaq PCSK series attenuates the intermittent nature of renewable energy sources, to provide a smoother power output. The Freemaq PCSK controls the ramp rate at which power is injected into the grid, and thus reduces the impact of rapid power fluctuations due to sudden or transient conditions experienced by the PV array.
