

# Skoon energy North Korea

Who is skoon?

Skoon is a young and dynamic company committed to making clean energy accessible and affordable for everyone. Our central platform connects users with suppliers of clean energy systems for temporary applications, such as construction sites and sports events, as a clean alternative to diesel generators.

Who is skoon energy?

Skoon provides local electricity. Our Marketplace partners are based around the world and we enable access to megawatts of flexible energy systems to businesses and projects of all sizes. " Innovation and collaboration are priorities for Enexis. That's why partnering with Skoon Energy has been a game-changer.

What does skoon do?

Skoon supports aid organisations and response teams to source silent and clean energy systems. The shipping industry is one of the most energy intensive industries and needs to transform to net zero operations, at shore and on sea.

How can skoon help you power your project?

Skoon helps you power your project: No matter where you work, you can power your ambitious project using clean energy systems. Select your industry to find out how we can help. Construction companies face the challenge of having to transition to electric and hydrogen powered machinery to meet global net zero ambitions.

Why did Enexis partner with skoon energy?

" Innovation and collaboration are priorities for Enexis. That's why partnering with Skoon Energy has been a game-changer. Their innovative approach and collaborative spirit have enabled us to swiftly create a mobile flex test setup, effectively tackling grid congestion.

At Skoon, we are helping you make the switch from diesel to sustainable mobile energy solutions tailored to your project's unique needs. From events to construction sites, we offer the ...

Skoon Energy is a company that develops a platform for connecting energy providers and consumers. It provides a digital hub using which clean energy systems can be shared by their providers. Its platform reduces reliance on fossil fuel-based energy sources and provides zero-emission energy for different applications.
