Wholesale Lithium-Ion Battery for PV Systems? Simply put, a lithium-ion battery (commonly referred to as a Li-ion battery or LIB) is a type of rechargeable battery that is commonly used for portable electronics and electric vehicles. The popularity of this kind of battery is also steadily growing for military and aerospace applications.

Batteries play a vital role in solar energy systems by storing excess electricity generated from solar panels during periods of sunlight. [Read More](#)

Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate.

Libyan Solar Systems Company has hands-on experience in customized solar energy arrangements, such as evaluation and design of solar energy systems, energy storage solutions / battery backup, monitoring and maintenance.
