

Solar container development implementation plan for bloemfontein

Where is a 100 MW solar PV facility located?

Description of Proposed Development: Notsi PV (Pty) Ltd are interested in developing a cluster of 100 MW solar PV facilities and associated infrastructure of an area located on Farm 1623 Ebenhaezer, located approximately 13 km southwest of the centre of Dealesville in the Free State Province.

Where is the Notsi solar project located?

The footprint of the proposed Notsi Solar Projects, and associated infrastructure, is located across several private agricultural camps approximately 15 km southwest of the town of Dealesville, in the grassland biome of the summer rainfall region of the Free State Province, South Africa.

Are there any objections to the development of Notsi solar projects?

Concerning the Stone Age archaeology within the footprint of the proposed Notsi Solar Projects, there are no objections to the authorization of the proposed development, provided that the buffer described above is adhered to.

How do I get access to the solar field?

Roads - Access will be obtained via the S322 secondary road and various gravel farm roads within the area and adjacent property. An internal site road network will also be required to provide access to the solar field and associated infrastructure. Access roads will be up to 8m wide (6m wide road surface, with 1m drainage either side).

SunContainer Innovations - As South Africa's judicial capital seeks reliable power solutions, energy storage systems are becoming the cornerstone of Bloemfontein's renewable energy transition. With ...

Discover leading solar panel installation companies in Bloemfontein for affordable, reliable, and efficient solar solutions.

In his chapter in the 1991 book, Krige (1991, p. 104) describes the Bloemfontein-Botshabelo-Thaba Nchu (BBT) region as a "microcosm of apartheid planning": Thaba Nchu being "an exclave of "independent" ...
