

Solar container major news bond default

Are solar loan defaults catching bond investors?

Surging defaults on loans used to buy residential solar panels are cascading through Wall Street, catching bond investors and private-credit funds in their wake. Some bonds tied to GoodLeap, a financial-technology firm that lends money for solar installations, have stopped paying interest, people familiar with the matter said.

Why did goodleap's solar bonds stop paying interest?

Some bonds tied to GoodLeap, a financial-technology firm that lends money for solar installations, have stopped paying interest, people familiar with the matter said. The payments stopped because far more homeowners are defaulting on the loans than initially forecast, they said.

How do solar bonds work?

Like other asset-backed securities, solar bonds are split into levels, or tranches, made up of pools of thousands of loans. Investors in the highest tranches get priority on payments and if defaults climb above preset thresholds, interest payments to the junior tranches stop.

Why did solar bonds stop paying mortgage payments?

The payments stopped because far more homeowners are defaulting on the loans than initially forecast, they said. Solar bonds are one niche in the growing ecosystem built by nonbank lenders like GoodLeap, which use artificial intelligence and financial-market expertise to let Americans borrow with a click of the mouse.

Does Sunnova have a bad cash flow in 2025?

Sunnova, the second-largest residential solar financier in the country, appears to be burning through cash rapidly; it enters 2025 with \$8.46 billion in debt and a negative cash flow. And the company reported just \$2 million in cash generation for the fourth quarter, well below its guidance of \$104 million.

Will Sunnova energy continue operations in 2024?

In its 2024 earnings call yesterday, Sunnova Energy said there is "substantial doubt" about its ability to continue operations for the next year. The Houston-based residential solar company issued a "going concern" warning, shocking investors and causing the company's stock to plummet by nearly 60%, reaching an all-time low of 66 cents per share.
