Could a new solar panel roof make Rome a green city?

A new solar panel roof has been inaugurated at the Vatican to provide renewable energy to the museum. It's part of Pope Francis' plans to ensure the city state in Rome runs entirely on green energy. Italian energy supplier ACEA installed the photovoltaic roof in just six months in the Courtyard of the Corazze entrance.

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

What did Pope Francis say about solar power?

Pope Francis outlined his green vision for the Vatican in his 'Brother Sun' letter in June. In it he said solar panels would be installed on a Vatican-owned property outside Rome and the power generated from that could supply all of Vatican City's energy needs. How can the Vatican save CO<sub>2</sub>?

In the heart of the Vatican, we converted 2,134m<sup>2</sup> of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO<sub>2</sub> each year.

How long did it take ACEA to install a photovoltaic roof?

Italian energy supplier ACEA installed the photovoltaic roof in just six months in the Courtyard of the Corazze entrance. "The most difficult thing is to integrate and find spaces to build photovoltaic infrastructure in places that are already heavily built up," said ACEA president, Barbara Marinali.

The Pope has ordered that a solar PV project be built in the Vatican City, with a capacity sufficient to power all of the mini-state's electricity needs.

5 "Completed in record time almost on the eve of the Jubilee Year, a new photovoltaic system has been installed in the Cortile delle Corazze in the entrance of the Vatican Museums and will produce electric energy from a renewable resource.. With this project, the Governorate of Vatican City State is implementing the guidelines Pope Francis outlined in the Encyclical ...

2 "In it he said solar panels would be installed on a Vatican-owned property outside Rome and the power generated from that could supply all of Vatican City's energy needs. "It is necessary to transition to a sustainable development model that reduces greenhouse gas emissions into the atmosphere, aiming for

climate neutrality," the pontiff wrote.

Combine a power inverter, a deep-cycle battery, some cable, and a solar charge controller with some AIMS Power solar panels, and you'll be on your way toward energy independence in Vatican City.

Bioenno Power 12V/24V, 20A/30A Solar Controller is a versatile controller for solar systems, that is exclusively for charging LiFePO4 (Lithium Iron Phosphate) batteries! This solar controller accepts either 12V/24V input from solar panels and can handle up to 30A.

Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, Fratello Sole, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.

IN STOCK: best prices on 12V/24V 30A PWM Solar Panel Charge Controller LCD Display Dual USB Port, TTY02047-GB.
