Will Ivory Coast build a floating solar power plant?

Ivory Coast Launches Tender for 20 MW Floating Solar Power Plant in... The state-owned electric utility of Ivory Coast, Côte d'Ivoire Energies (CI-Energies) has launched a call for tenders for the construction of the Kossou floating solar power plant and its associated transmission network.

Will CI-Energies build a floating solar power plant in Côte d'Ivoire?

The state-owned electric utility of Ivory Coast, Côte d'Ivoire Energies (CI-Energies) has launched a call for tenders for the construction of the Kossou floating solar power plant and its associated transmission network. The floating solar power plant will be developed in the Kossou dam lake on the Bandama River.

How much solar power does Ivory Coast have?

According to the International Renewable Energy Agency (IRENA), the Ivory Coast had only 13 MW of installed solar power at the end of 2020. Currently, the sub-Saharan country relies heavily on fossil fuels, notably oil and natural gas.

How much solar power does Ivorian government need?

The Ivorian government is planning to meet increasing energy demand by adding around 150 MW per year through IPPs, according to the United States Agency for International Development (USAID). According to the International Renewable Energy Agency, the Sub-Saharan country had only 13 MW of installed solar power at the end of 2020.

Is Abidjan a good place to install solar power?

Abidjan, Ivory Coast, is a highly suitable location for solar photovoltaic (PV) power generation due to its relatively consistent average daily energy production per kW of installed solar across all seasons. In this city, the average kWh per day per kW of installed solar is 4.79 in Summer, 5.36 in Autumn, 5.25 in Winter, and 5.53 in Spring.

Who financed the French floating solar PV plant?

The floating solar facility is being financed by the French Development Agency (AFD) with an EUR80 million loan. The floating solar PV plant will join two other under-construction facilities, under public-private partnerships (PPP) for a total capacity of 60 MWp.

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to generate 42% of its electricity from renewable energy by 2030.

The 75.6 million euros (\$82.1 million) cost of building the solar power station was financed by Ivory Coast, a German loan, and a European Union grant. "This is the result of the EU's long-standing commitment to the

renewable energy sector, ...
