

French power supplier Soregies has tied up with compatriot SCP to jointly build four floating solar arrays totalling 12 MW in Canal de Provence, southern France.

French company SolarinBlue has been awarded EUR6m (\$6.44m) by the French Government for its offshore solar project as part of the France 2030 programme. The programme, operated by the French Agency for Ecological Transition, ADEME, will support the M&#233;ga S&#232;te pre-commercial demonstrator project for a floating solar farm in the S&#232;te-Frontignan ...

Holosolis, partly owned by EU sustainable energy investor EIT InnoEnergy, on Tuesday unveiled plans to build what it says will be the largest solar module factory in Europe.

French PV module manufacturers Carbon and Holosolis said this week that they have both filed requests for construction permits to build 5 GW solar cell and module manufacturing facilities in...

The 14.7MWp floating solar plant has been commissioned in Peyrolles-en-Provence, in the French department of Bouches-du-Rh&#244;ne. The facility consists of more than 43,000 photovoltaic panels assembled into a 12-hectare island in the "Chapeliers" basin, a former gravel pit undergoing a global redevelopment operation.

The 14.7MWp floating solar plant has been commissioned in Peyrolles-en-Provence, in the French department of Bouches-du-Rh&#244;ne. The facility consists of more than 43,000 photovoltaic panels assembled into a 12 ...

French manufacturing startup Carbon plans to launch the first part of its module production facility in autumn 2025, as part of a plan to bring 5GW of cell and 3.5GW of module manufacturing ...

The Creil solar farm, which is said to be France's second largest, is set to provide enough energy to power 85,000 families' homes annually. Commencement of the solar farm follows after the French Energy ...

French PV manufacturing startup Carbon has chosen a location for a proposed cell and module factory which it plans to bring into operation in late 2025. The plant would be Carbon's first ...

French startup Holosolis, founded by innovation group EIT InnoEnergy, has planned to build a 5GW solar module assembly plant in France.

French company SolarinBlue has been awarded EUR6m (\$6.44m) by the French Government for its offshore solar project as part of the France ...

# Solar made in French Southern Territories

The Creil solar farm, which is said to be France's second largest, is set to provide enough energy to power 85,000 families' homes annually. Commencement of the solar farm follows after the French Energy Regulatory Commission (CRE) awarded the company 257MWp of various ground-mounted PV projects in a call for tenders.

While traditional telecom infrastructure is minimal due to the region's isolated nature, satellite communication systems are in place to cater for the limited inhabitants. Given the remote and harsh conditions, renewable energy, particularly wind ...
