Solar panel class a Philippines

Solar panel prices in the Philippines are affordable for the average household. What's more, homeowners are noticing up to 50% reduction in their monthly utility bill. Solar panels can pay for themselves in 5 years, and since each solar panel can last 25 years on average, it's considered better than a time deposit.

The article presented the current prices of photovoltaic panels in the Philippines. I found out that the average price of one 300 Wp solar panel starts from Php 7,068, and more expensive, more efficient ones can cost up to Php 42,412 per unit.

Calculate the cost of solar panels. A standard solar panel produces around 1.24 kWh per day and costs approximately PHP11 to PHP12 per watt. Solar panels from well-known manufacturers cost up or more per watt. You can multiply your recommended wattage by PHP11 to PHP12 per (or more) to get an approximate cost for all your solar panels.
