How much does it cost to install solar panels?

The cost of installing solar panels ranges, on average, between \$5,400 and \$18,000 but can vary greatly depending on factors like the size of the system and the number of components.

How much power does a solar panel produce?

Most modern residential solar panels have a power output rating of 250 to 400 watts. Generally, higher-wattage panels are preferable to lower-power ones. However, your needs and budget are factors when deciding wattage output per panel. This is especially important for those living in warm climates.

How long do solar panels last?

Some solar users opt for systems large enough to generate just enough power to meet their needs, while others choose systems that allow them to live off the grid or even sell power back to their local energy provider. The typical product warranty for solar panels is 25 years.

How efficient are solar panels?

A solar panel's efficiency rating is stated as a percentage. The current industry average is around 18%. High-performance solar panels can produce efficiency ratings of over 22%, while budget products come in at approximately 16% efficiency. But that's only part of the equation.

How much does a polycrystalline solar panel cost?

Polycrystalline solar panels have efficiency ratings ranging from 13% to 20%. Due to lower production costs, they generally cost between \$0.75 and \$1 per watt. Thin-film solar panels are rapidly improving in efficiency and durability and now experience ratings of between 9% and 18% and rising. Current costs are between \$0.75 and \$1.10 per watt.
