

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

Ivory Coast inaugurates its first solar power plant in Boundiali, marking a shift towards renewable energy. The project aims to reduce reliance on fossil fuels and double its capacity to 80 MWp by 2024. It employs 350 locals and serves as a model for sustainable development in the region.

Ivory Coast unveiled its inaugural solar power facility aligning with its ambition to derive 45 percent of its energy from renewable sources by 2030. Situated in Boundiali, a town in the north with a population of 40,000, the 37.5-megawatt (MW) plant is anticipated to enhance electricity access for over 430,000 households, with a focus on rural ...

The government of the Ivory Coast has signed a concession agreement with infrastructure investor PFO Africa for a 52 MW solar PV plant in the village of Sokhoro, in the northern part of the...

The Bondoukou solar power plant will be located in the Gontougo region of Ivory Coast, approximately 420 km northeast of Abidjan, the economic capital. It will cover an 85-hectare site and have the capacity to inject 87,100 MWh ...

A 52 MW photovoltaic solar power plant is set to be constructed in Ivory Coast. This follows a concession agreement inked between the country's government and PFO Africa. The 25-year agreement covers the design, financing, construction, operation and transfer of ...

Inaugurated in June 2023, the plant consists of 68,000 solar panels on 36 hectares, with the aim of doubling this figure by the end of 2024 to reach a capacity of 80 MWp. The project, with a total cost of 75.6 million euros, is financed by Côte d'Ivoire, a German loan and a grant from the European Union.

In April this year, Ivory Coast inaugurated its first solar power plant. The 37.5 MW Boundiali solar plant supplies clean electricity to 35,000 households while reducing greenhouse gas emissions by an estimated 60,000 tons of CO₂ per year. The second phase of the project is expected to reach commercial operation by April 2025, with total ...

The authorities in the Ivory Coast have completed a 37.5 MW solar plant, with a second development phase now underway to increase its capacity to 80 MW.

Solar panels plant Ivory Coast

As part of its drive to diversify electricity generation sources and increase the share of renewable energies in its energy mix (45% by 2030), Ivory Coast commissioned RMT to build the country's very first photovoltaic solar power plant, with a capacity of 37.5 MWp, spread over 69,440 550 Wp solar panels and 168 inverter-strings of 250 kVA.
