Experience the perfect combination of durability and adaptability with StorMaxx(TM). Questions? Ready To Get Started? READY TO START? CALL - 1.877.786.6299

How does a solar water heater work?

A solar water heater uses sunlight to heat water. You can use this hot water for showering or cooking. A solar collector is nothing but a plate placed on the roof that captures sunlight. You can compare it a bit to a solar panel. It is a tube system containing liquid, connected to a storage vessel.

How many gallons can a tank hold?
