

Depuis 1998, Albioma contribue avec Gardel à l'autonomie énergétique de la Guadeloupe, en produisant de l'électricité à partir de la biomasse locale, la bagasse, au sein de la centrale du Moule.

Sainte-Marguerite is the second ground-based solar farm combined with an agrivoltaic component to be built by Akuo in Guadeloupe. It was commissioned in 2011, and is located in Sainte-Marguerite, in the town called Le Moule, on Grande Terre island.

Sensible au développement durable et local, le groupe GBH a mis en place un vaste programme d'autoconsommation sur ses différentes enseignes. En Guadeloupe, plus de 13 000 m² de panneaux solaires ont été posés sur les toits de la galerie Destreland et Carrefour Grand Camp.

Mindful of sustainable and local development, the group GBH has put in place a vast self-consumption programme across its various brands. In Guadeloupe, more than 13,000 m² of solar panels have been placed on the ...

Growth Potential of Solar Photovoltaics in Guadeloupe
The PPE's Objectives for Solar Photovoltaics
The regional government's solar photovoltaics policies have several objectives: Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors [...]

Mindful of sustainable and local development, the group GBH has put in place a vast self-consumption programme across its various brands. In Guadeloupe, more than 13,000 m² of solar panels have been placed on the rooftops of the Destreland shopping centre and Carrefour Grand Camp.

Since 2008, Albioma has been developing its solar activity in Guadeloupe. The Group currently operates four photovoltaic plants in Jarry, Sainte-Rose and Basse-Terre, all of which are located in areas with no conflict of use.

1400 heures environ d'ensoleillement annuel en Guadeloupe constituent un atout majeur pour la production solaire. Les installations photovoltaïques connectées au réseau sont disséminées sur tout l'archipel ...

Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors of renewable energy and across Guadeloupe; Manage the development of the sector by selecting the solar photovoltaic projects that are the most beneficial for Guadeloupe

Solar works Guadeloupe

The Jarry Silo site hosts the third solar power plant built, commissioned and operated by Albioma in Guadeloupe. Located in an area that enjoys very long sunshine hours but is not connected to mainland power networks, CTM has an installed capacity of 192 kWc and supplied 155 MWh of electricity in 2022.

Prioritize rooftop solar panels; Limit land use by ground-mounted solar panels; Increase transparency of conditions for connecting to the electricity grid and for ground-mounted solar photovoltaic projects in Guadeloupe; Based on this guidance, a specific framework was created in Guadeloupe that included:

1400 heures environ d'ensoleillement annuel en Guadeloupe constituent un atout majeur pour la production solaire. Les installations photovoltaïques connectées au réseau sont disséminées sur tout l'archipel mais de façon hétérogène. En effet, 64% de puissance installée est concentrée sur 4 communes de l'île : Baie-Mahault, Petit ...
