2. The inverter converts the solar DC power into 240 volt alternating current (AC) power which is ready to use in your home or to export into the grid. 3. AC power from the inverter goes through your switchboard for use in your home. 4. Solomon Power's meter records the power supplied from the grid that is consumed in

Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates.

We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions. We only use GEL lead acid or Lithium batteries; quality components from manufacturers like Victron Energy, and we ensure that we "oversize" the ...
