Who is MBT petroleum?

MBT Petroleum is a Schedule C oil company, operating within the South African petroleum and lubricant sectors. We distinguish ourselves from our competitors by PROVIDING dynamic service, an innovative radical approach and we offer excellent customer relationships and trust. We pride ourselves in sustainability due to ethical business.

Is MBT petroleum BEE compliant?

South Africa is also home to secondary-tier petroleum suppliers - referred to as non-refining wholesalers - in which MBT Petroleum is among the leaders and recognised as BEE compliant in the Oil Industry Fuel Charter.

What services does MBT petroleum offer?

Alongside the Company's extensive work in retail development, MBT Petroleum now offers full installation services for its tanks and pump sets as well as the maintenance thereafter.

How does MBT petroleum distinguish itself from competitors?

MBT Petroleum is distinguishing itself from competitors through the establishment of a dynamic service to rival any company operating within the industry.

What is MBT doing now?

Currently, we're focused on the expansion and branding of existing and new, retail service stations. An MBT service station is affordable and attainable for entrepreneurs and existing operators. That's why we're enjoying tremendous growth and unrivalled success - and we're showing no signs of slowing down.

Does MBT have a metered tanker fleet?

MBT also has its own up-to-date fleet for the delivery of products to customers, including a selection of state-of-the-art metered tankers that are managed by a competent team of technical, administrative and operational management staff.

MBT Petroleum (Pty) Ltd was founded in 2004 by C.E.O. Johan Fouch, who identified an opportunity within the petroleum sector for an aggressive, service driven and motivated organisation which offers superior customer service, competitive pricing and excellent communication - ultimately putting the customer first.

South Africa faces significant climate, energy, and transition risks due to its reliance on fossil fuels, alongside high levels of poverty, inequality, unemployment, and energy insecurity. To address these challenges, the Just Energy Transition (JET) aims to transition the economy from fossil fuels to cleaner energies and accelerate the
