Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Why should South Sudan invest in solar energy?

This means that South Sudan should have regulatory framework and good investment policies that can attract reputable companies that will bring technology and pool of expertise to develop the solar energy sector and associated power industries in the country.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

Is Sudan suitable for solar energy production?

According to Abdeen M.O.(2009,p.9), Sudan is considered one of the best countries for exploiting solar energy due to its average sunshine duration, which ranges from 8.5 to 11 hours a day.

Does South Sudan have a fight against energy poverty?

The good news is that South Sudan has already started its fight against energy poverty and one evidence for that is the ongoing construction of Nesitu 20MWp PV Solar +35MWh BESS power plant at Nesitu, Juba.

Who is Pi solar technology?

PI Solar Technology GmbH, Berlin, Germany. Y Consulting of companies in solar panel manufacturing Y Market research and new product developments. States . Y Commissioning of APS Cotton Center 18 MW Solar Plant, Gila Bend, AZ, USA and Responsible of Solar Panel Quality for projects.
