

South Sudan vehicle to grid system

Are there mini-grids in South Sudan?

Several companies have developed and operate mini-grids in South Sudan, as summarised in Annex 4. Data on type, number of end users, and retail tariffs were unavailable for all companies apart from SunGate Solar.

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

Is finance a barrier to developing a mini-grid supply chain in South Sudan?

The lack of access to finance was identified as a critical barrier to developing the off-grid and mini-grid supply chain in South Sudan. One of the respondents in the study reported that financial institutions charge high interest rates, up to 22%, thus making it unattractive to borrow money to expand business activities.

What is the South Sudan off-grid market?

Developing the off-grid products supply chain and product line The South Sudan off-grid market is dominated by non-specialised vendors and retailers who sell other products, including off-grid products. Most of the products are not quality-verified, nor do they receive any incentives to target end-users who cannot afford a one-time upfront payment.

How many South Sudanese have access to electricity?

According to the study, only 5.4% of the South Sudanese population have access to electricity, slightly higher than the access rate of 4.2% reported in 2017.

Do health institutions in South Sudan have access to electricity?

About 30% of South Sudan health institutions do not have access to electricity. However, there were disparities where 15.0% of health institutions in urban areas lacked access to electricity compared to 33.2% of health institutions in rural areas reported lacking electricity access.

The study had four specific objectives, namely: (1) to analyze the demand and supply of modern off-grid technologies; (2) to assess the local financing market for standalone ...

through an off-grid solution and introducing PV system to supplement grid electricity for 87 primary and 15 secondary schools 35 Table 12: Estimated investment costs for electrifying 562 government offices through an

The African Power Platform aims to connect private and government stakeholders in Africa's power sector. The platform helps circulate and propagate tenders, intelligence and business opportunities to its members.

Developers, power ...

The Ethiopia-South Sudan Interconnector will supply approximately 100 MW to the Malakal Regional Grid, and the Uganda-South Sudan Interconnector will supply approximately 100 MW to the Juba Regional Grid. Domestic generation, combined with interconnection supply, will provide relatively inexpensive power to regional grids [51]. During t this ...

For electricity planning in South Sudan, this study investigated two types of power grid systems: centralised and distributed systems. This project confirms, through statistical analysis and interviews with engineers and policymakers, that a hybrid approach of both systems is the best option for building a national power grid.

In 2020, the World Bank, in response to South Sudan's transitional government's request, set up the Pathways to Electricity Access Expansion in South Sudan ASA (Advisory Services and ...

EED Advisory conducted a national off-grid and mini-grid market assessment of South Sudan, revealing that only 5.4% of South Sudanese have access to electricity. The research shows that 94.7% of households lack electricity, with only 1.8% connected to mini-grids, 0.03% using diesel generators, and 3.44% using off-grid technologies.

The African Power Platform aims to connect private and government stakeholders in Africa's power sector. The platform helps circulate and propagate tenders, intelligence and business opportunities to its members. Developers, power producers, ministries, utilities, regulators, financiers, and other like-minded individuals can join APP to share possible solutions and ...
