

Spi energy solar4america Croatia

Who is SPI solar?

The SPI Solar commercial & utility solar division provides a full spectrum of EPC services to third party project developers, and develops, owns and operates solar projects that sell electricity to the grid in multiple regions, including the U.S., U.K., and Europe.

Where are SPI solar wafers made?

SPI's Sacramento, California manufacturing facility. In September 2022, SPI Energy registered its U.S. solar wafer manufacturing business, SEM Wafertech Inc., for production of wafers starting this year with initial capacity of 1.5 GW, with plans of expanding manufacturing capacity to 3 GW in 2024.

Where is Solar4America manufactured?

The Solar4America module manufacturing facility in Sacramento, Calif. currently produces approximately 700MW. Total combined capacity of the S4A California and South Carolina locations will reach 2.4GW in 2024.

Does SPI energy participate in re+?

SPI Energy is proud to participate in RE+, formerly known as "Solar Power International". Since its inception in 2004, the event brings together the people, products, and professional development opportunities that drive the solar marketplace.

What's new at Solar4America?

We are very excited to meet this important milestone for our company and offer the best domestic-made solar module products to our customers to meet the increasing demand for American-made modules. The Solar4America module manufacturing facility now produces 700MW with capacity ramping up to 2.4GW in 2023.

Where does SPI invest?

SPI maintains global operations in North America, Australia, Asia and Europe and is also targeting strategic investment opportunities in fast growing green energy industries such as battery storage, charging stations, and other EVs which leverage the Company's expertise and substantial solar cash flow.
