

St Vincent and Grenadines solar panels quote

Solife Inc. is a privately held EPC company located in St. Vincent and the Grenadines. We have been in operation since 2011 and have completed 3.8 MW of solar system installations on the island, and have consulted/assessed over 40 MW of Solar systems regionally.

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save thousands of dollars with our payment plans of little to no upfront cost, hassle free.

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the vicinity of the Argyle International Airport.

The Mayreau Microgrid Solar Project is in its final stage, which is the testing and commissioning of the solar photovoltaic (PV) and Battery Storage system. St. Vincent Electricity Services Limited (VINLEC) and the Rocky Mountain Institute - Carbon War Room (RMI-CWR) partnered on this initiative which introduced renewable energy for electricity ...

Later, it was found that the product that can use the sun to generate electricity is called off grid solar power system, which uses the solar heat energy to convert into electric energy, without high maintenance costs, and is a green and quiet power generation product.

3 · The project will increase the supply of sustainable, low-carbon energy to the national grid in Saint Vincent and the Grenadines. Last Updated - 20/12/2024 CONTACT

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to increase the penetration of renewable energy in the production of electricity.

EcoDirect designs and supplies solar + battery projects in St Vincent and the Grenadines. Our team has the tools and experience to get your next project designed and delivered. Request a Quote!

The project sets a strong precedent for using renewable energy to drive down energy costs on the outer islands. Located on Union Island, the 600kW solar PV plant is connected to a 637 kilowatt-hour (kWh) lithium-ion battery, extending its generating capacity to supply all of Union Island's daytime power requirements.
