

Greece's Ministry of Environment and Energy has revealed a new EUR200 million (\$215.3 million) subsidy program for solar projects and small storage systems in the residential and agricultural...

With a budget of EUR 200 million (USD 217.5m), the programme will enable households and farmers to install up to 10.8 kW of PV capacity and 10.8 kWh of battery storage, Energy Minister Kostas Skrekas announced.

The Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) has launched the country's third auction for standalone, grid-scale, front-of-the-meter battery energy storage systems. The auction seeks to award 200 MW of battery storage projects, 100 MW less than initially announced when the 1 GW subsidy program for this type of energy ...

Greece has officially launched its third tender for battery energy storage capacity, aiming to allocate 200 MW of projects eligible for subsidies of up to 200,000 euros per MWh. This tender marks the final phase of Greece's ambitious 1 GW program, which is designed to support the development of standalone energy storage installations across ...

Greece's energy storage market is hot with a number of new policies paving the way to new applications in the market. The government is now working a new plan, which will allow the colocation of batteries with existing solar plants as well as standalone, in front of the meter battery energy storage systems.

The European Commission has approved EUR1 billion (\$1.08 billion) of Greek measures under EU state-aid rules to support two utility-scale solar projects with lithium-ion batteries and molten-salt...

With a budget of EUR 200 million (USD 217.5 m), the programme will enable houses and farmers to install approximately 10.8 kW of PV capacity as well as 10.8 kWh of battery storage, Energy Minister Kostas Skrekas introduced.

The Greek government is preparing a plan to continue supporting battery storage investments. The first two auctions for standalone projects have been completed and a third will take place later this year. Altogether they are supporting the installation of the first 1 GW of battery storage in the country.

The government is now working a new plan, which will allow the colocation of batteries with existing solar plants as well as standalone, in front of the meter battery energy storage...
