

Sunfly energy Nicaragua

What is Nicaragua's energy supply?

"This gives us a guarantee that the project will be carried out in the best way and will ensure its best performance." Around 60% of Nicaragua's total energy supply is drawn from renewable sources, with biomass (41.8%) accounting for the largest share of generation as of 2022. The remaining 40% is supplied by oil imports.

Does Nicaragua need a wind farm?

With the idea that the Polaris power plant in San Jacinto, in León Department, will supply nearly 20% of Nicaragua's energy needs, the International Finance Corporation (IFC) partially financed the US\$450 million, 72MW plant. Wind farms Nicaragua is also focusing on another renewable energy source: wind.

How much energy does Nicaragua use?

According to the International Energy Agency, Nicaragua supplies around 60% of its total energy from renewable sources, including wind, solar and geothermal, with biomass - an often contested renewable - accounting for the largest share, at roughly 40% of total supply.

Is Nicaragua's energy mix renewable?

Currently, the electricity mix is nearly 50% renewable but the entire energy system is highly dependent on fossil fuels and biomass. This work aims to show potential for a renewable transformation of the Nicaraguan energy system.

Why are energy costs a problem in Nicaragua?

A 2015 study by the Economic Commission for Latin America and the Caribbean (ECLAC) said Nicaragua's energy costs suppress the competitiveness of its industries and the wellbeing of its citizens: higher rates limit access to essential services, increase production costs and hold back economic growth.

Why does Nicaragua lose so much energy?

Local NGOs report that nearly 20% of Nicaragua's energy is lost due to poor connections and obsolete systems, while many informal connections drive up distribution costs. Furthermore, distributors pay the highest energy prices in Central America, an expense that is ultimately passed on to consumers.
