

Sunterra solar Solomon Islands

Is Sunterra a good solar company?

Overall, Sunterra delivered a cost-effective solar system that met my needs, accompanied by a first-rate installation and service experience. Sunterra came as a referral from a friend who has had the system for a few years. I prefer using products and companies that family and friends have used before as their reviews are usually accurate.

How does Sunterra work?

This is the foundation SunTerra works from. SunTerra is transforming solar energy beyond intermittent and disruptive making it useable, available, and dispatched when electricity customers need it most.

Why should you choose Sunterra?

Creating economic development and jobs in service, knowledge, manufacturing, hospitality, and more are pivotal to ensure the people of the Caribbean thrive. At SunTerra we develop people while transforming the energy sector. Resources from the sun is the most readily available and easily convertible renewable energy in the Caribbean.

What are Sunterra's values?

SunTerra's values shape our culture and how we conduct business: Caribbean sustainability is paramount to SunTerra and why we generate energy that produces no greenhouse gas emissions from fossil fuels and improves air quality.

Is the Caribbean a good place for solar energy?

The Caribbean is blessed with vast and readily predictable solar resources. Yet almost all countries within the region depend on fossil fuels for more than half of their energy needs. The cost of energy in the Caribbean is amongst the highest in the world, while in some cases reliability is amidst the worst.

Who is Sherry & what does he do for Sunterra energy?

Sherry has over 20 years in Marketing, Brand Development, Graphics, and Website Development experience. Developing consistent branding messages and content for SunTerra Energy, including Social Media Platforms and Branding Materials. From Logo Concept to Website and beyond Sherry has been a vital team member for SunTerra.

The Photovoltaic (PV) and battery system are sized to meet your power needs. A qualified installer will review your electrical loads and help you select the right equipment. For a full time home, a 1kW system will deliver on average about 4.5 kWh in the summer. Note that you can increase your solar system size at any time as your needs grow.

The company is actively pursuing additional renewable energy projects in Jamaica and throughout the
