Who is Suzlon Energy Limited?

Suzlon Energy Limited specializes in development, manufacturing and marketing of generation systems of wind energy. Net sales break down by activity as follows: - sale of wind turbines (56.4%); owns, at the end of March 2019, an installed capacity of over 18,000 MW; - operation and maintenance services (35.9%);

Where is Suzlon wind energy based?

Suzlon Wind Energy Corp. manufactures electrical power generation equipment. The company was founded on March 15, 2005 and is headquartered in Chicago, IL. Part of Suzlon Energy Ltd., Tarilo Holding BV functions as an office of bank holding Dutch company. The company is based in Amsterdam, Netherlands.

What is a Suzlon S 128 wind turbine?

This next generation turbine is well equipped to improve energy yield while protecting customers return on investment (ROI). Suzlon's S 128 wind turbine generator, featuring the Doubly Fed Induction Generator (DFIG) technology is a revolutionary addition to the renewable energy sector.

When did Suzlon get a wind turbine contract?

In June 2007, Suzlon had signed a contract with Edison Mission Energy (EME) of the United States for delivery of 150 wind turbines.

What is the difference between Suzlon S128 and S111 wind turbines?

This technology provides excellent performance at low wind sites. The S128 series offers ~33% more swept area (13,070 sq.m.) and is expected to deliver a massive increase in energy generation compared to the Suzlon S111 wind turbine generator. It is designed to optimally harness wind resources at higher altitudes making low wind sites viable.

What is Suzlon S133-105m?

Suzlon introduced the 3.0 MW platform to unlock unviable sites and deliver improved energy yield suitable for all wind regimes. The S133 is one of India's largest wind turbine generators (WTG). This platform is extendable up to 3.0 MW depending on the site wind conditions. The prototype of S133-105m was set up in August 2019.

The S128 wind turbine generator is the latest addition to Suzlon's product portfolio and features the time-tested Doubly Fed Induction Generator (DFIG) technology. It also consists of the blade measuring 63 meters and has a rotor diameter of 128 meters.
