

Svalbard and Jan Mayen energy storage services

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice -- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

Will Svalbard get a 6mw/7mwh power system?

The transport, industry and defense-specialised BESS provider will deliver the 6MW/7MWh system to the Longyearbyen community on the island of Svalbard for completion in late 2022. The bulk of Svalbard's population of slightly under 3,000 people live there.

While Norway once aimed to be the "battery of Europe" it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm ...

Svalbard and Jan Mayen, with their unique geographical and environmental characteristics, offer promising opportunities for emerging industries and investment prospects. [...]

Overview of key economic statistics. The statistical themes covered are: International trade, economic trends, foreign direct investment, external financial resources, ...

Saft has won a turnkey contract for a 7MWh battery energy storage system (BESS) in a Norwegian archipelago which it claims is the largest in the Arctic, although much larger projects near the polar circle have progressed recently too.

French battery technology company Saft has won a contract to provide an energy storage system (ESS) for the community of Longyearbyen in Svalbard, the island group in the ...

While Norway once aimed to be the "battery of Europe" it has since been overtaken other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's energy storage market dynamics in this long-form article.

Sval Energi, Storegga Geotechnologies, and UK-based Neptune Energy have applied for an offshore carbon storage licence together in Norway's Trudvang site. The application follows the announcement last month of a

new area in the North Sea for applications linked to the injection and storage of CO₂ made by the Norwegian Ministry of Petroleum ...
