

Tapping vast natural gas reserves could make the country a major global energy player--a new government program can help. Vaca Muerta, located in the Argentine province of Neuquén and home to one of the largest shale gas deposits in the world, has long been hailed as the key to making Argentina a major player in the global energy economy.

Complementariamente al Panel de Bonos SVS, en 2022 BYMA presentó un Panel de Bonos Vinculados a la Sostenibilidad que ya cuenta con 5 valores negociables listados.

In support of the region's energy goals, the report explores the opportunities and challenges that lie ahead. It provides insights on the ways in which the outlook for the region and the biggest global energy trends are deeply intertwined - as well as recommendations on policies that could allow Latin America and the Caribbean to take full ...

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining output from conventional oil and natural gas fields. From January 2021 through September 2024, crude oil production in Argentina increased by 50%, and natural gas production rose by 27%, ...

In 2020 Argentina continued to derive more than three quarters of its total energy supply from fossil fuels. Natural gas contributed 59% (up from 54.90% in 2019), followed by oil (27%, down from 32.81% in 2019).

Argentina has a role to play in the energy transition. Its gas, solar, wind, hydrogen and lithium resources can be exported to contribute with the net zero economy. This chapter studies the past, present and future of the Argentine energy mix and energy policy, with...

3 The headquarters of Argentina's state energy company YPF is seen in Buenos Aires, Argentina February 10, 2021. Picture taken February 10, 2021.

Shares in Vista Energy, which has benefited from its narrow focus on Vaca Muerta's shale oil to become Argentina's largest non-integrated producer, have soared almost 700 per cent in the past...

More than a quarter of the electricity generated in Argentina comes from renewables. The government launched a program in 2015 to promote the use of renewable energy in electricity generation, including a trust fund providing financial guarantees and ince

Argentina's energy matrix remains dominated by fossil fuels, which account for approximately 88% of its energy consumption (Lallana et al., 2021). Despite advancements in recent years, such as the 2016 RenovAr

Svs energy Argentina

programme, the country still faces difficulties in developing a renewable energy sector capable of competing in a matrix structurally reliant on ...
